OUR CALLING

Since the first manifestation in San Francisco on Easter Sunday, 1979, Sisters worldwide have devoted themselves to community service, ministry, and outreach to those on the edges, and to promote human rights, respect for diversity, and spiritual enlightenment.

MONKEYPOX: Get the FACTS

**This pamphlet is intended for educational purposes only. Facts on what you need to know and how to protect yourself. This does not take the place of a medical professional. If you believe you may have Monkey Pox, please consult a medical professional immediately.

MONKEYPOX 101

Staying safe and informed

Monkeypox virus is related to the smallpox virus.

Monkeypox symptoms are similar to smallpox, but milder and rarely fatal.

Monkeypox Symptoms

Include:

Fever | Headache | Muscle Aches

Backache | Swollen Lymph Nodes

Chills | Exhaustion

and a Rash that can look like

Pimples or Blisters

Monkeypox Rash

The monkeypox rash can appear anywhere on the body including mouth, genitals and anus. The rash will blister, scab, and fall off over a two - four week period. The person is contagious until the rash has fully healed and a fresh layer of skin has formed.

MONKEYPOX SPREADS THROUGH PHYSICAL CONTACT WITH:

- **Infectious rash, scabs, or body fluids**
- **Personal belongings (like clothing) that have made contact with sores**
- **Respiratory droplets**

Pregnant people can spread the virus to their fetus through the placenta.

HAVE SYMPTOMS? HERE'S WHAT TO DO:

- **Call a Healthcare provider immediately about getting tested!**
- **Isolate at home**

Avoid any close physical contact

Wear a mask when around
